

# Ocultar Textos em Imagens

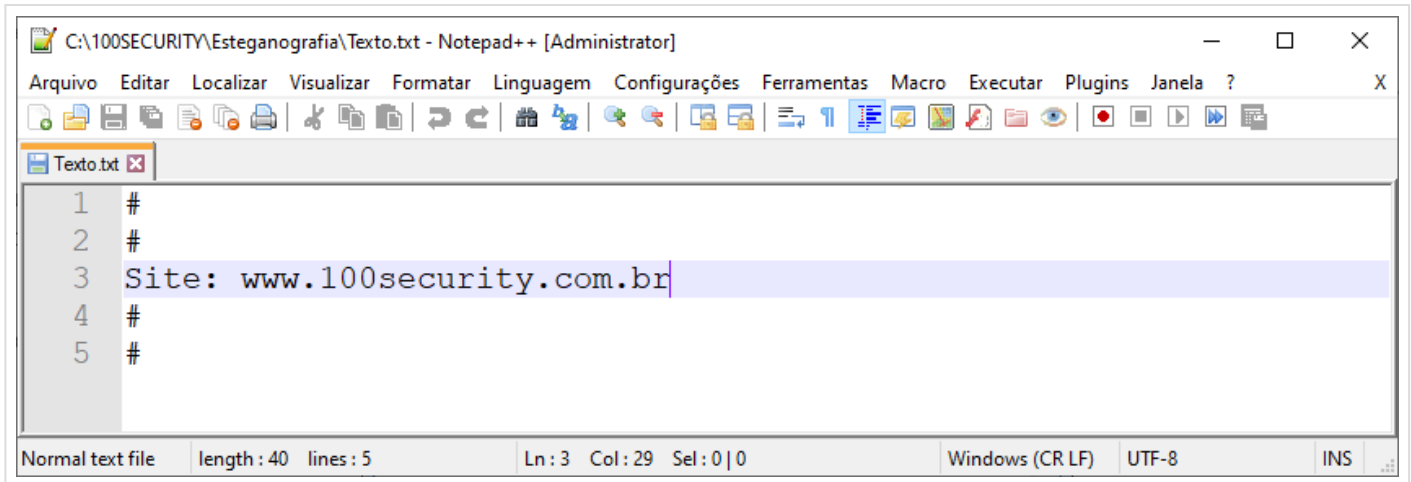

Ocultar Textos em Imagens é apenas uma das formas de Esteganografia (do grego "escrita escondida"), é uma técnica muito utilizada para a troca de informações confidenciais.

A ferramenta **JPHS** pode ser utilizada para esta prática de forma descomplicada.

Download: [Windows](#) | [Linux](#)

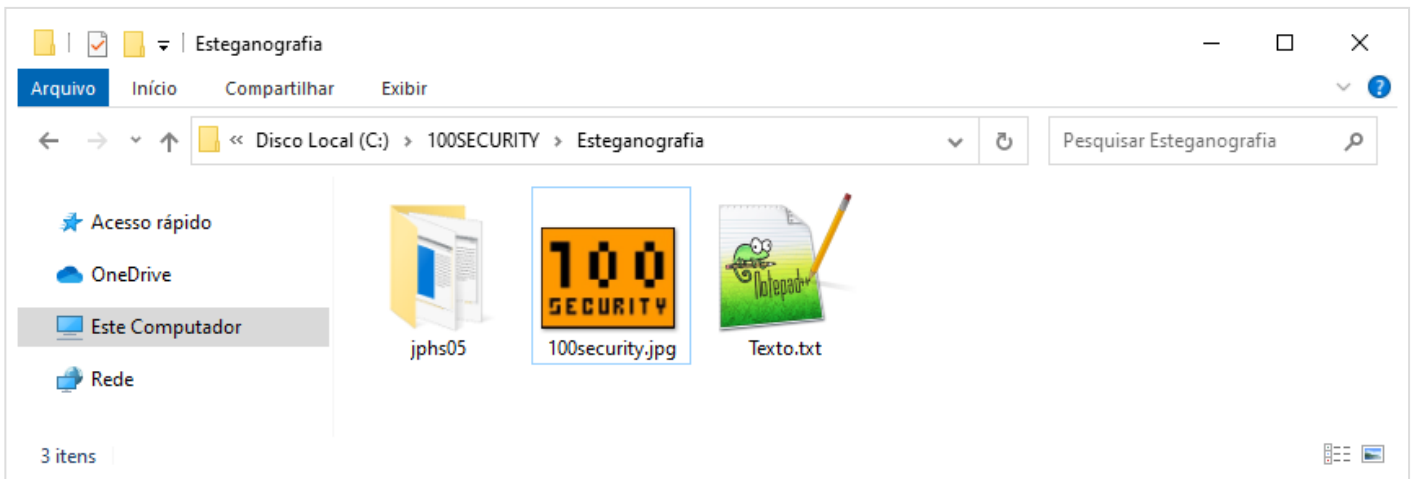

## 01 - Passo

Crie um arquivo de Texto.

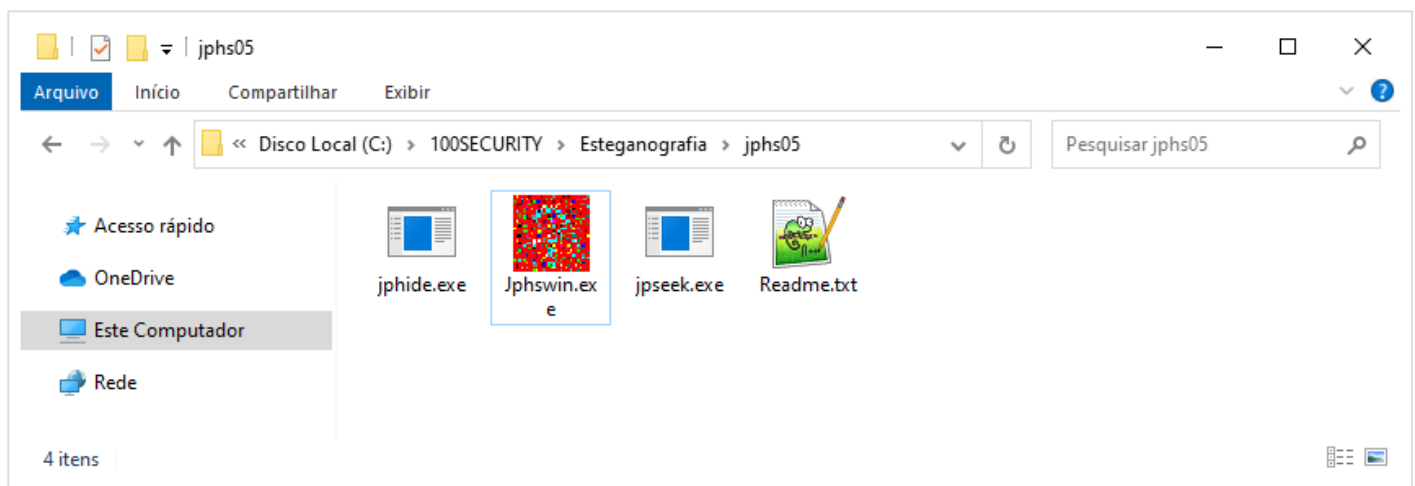

## 02 - Passo

Selecione uma Imagem para que o arquivo **Texto.txt** possa ser ocultado.
